Coverage

UNIVERSE

Objectif du projet

Cette revue de portée (scoping review) vise à cartographier les connaissances scientifiques relatives aux interventions et campagnes diffusées sur les réseaux sociaux pour prévenir l'initiation au tabagisme, au vapotage et à l'utilisation de produits contenant de la nicotine, ou pour favoriser leur arrêt chez les adolescents et jeunes adultes.

Méthodologie

Une revue de portée sera réalisée conformément aux recommandations du cadre méthodologique PRISMA-ScR. Une recherche systématique de la littérature sera menée dans les bases de données PubMed, Embase, Web of Science et PsycINFO. Les études publiées entre 2015 et 2026, en langue anglaise, portant sur des interventions ou campagnes de prévention ou de cessation diffusées sur les réseaux sociaux auprès d'adolescents et de jeunes adultes seront considérées pour l'inclusion.
